

# CONFIRMATION BIAS

## FOR IMMEDIAT RELEASE

**CB Records is excited to declare the release of the debut single from Confirmation Bias, Epiphany, which will be available worldwide on the 17th of March 2023.**

Epiphany is our debut single to our upcoming album releasing later this year. Epiphany is a prog-rock/art-rock song that can compare to the style of Porcupine Tree, Saga, Opeth, Ayreon, Neal Morse, Spock's Beard, Marillion and many other prog artists.

Epiphany has been written over the years and can now finally see the light of day.

With major focus on songwriting, arrangement, composition, production and mastering, we want to tell the story of the mind. We follow a story of feeling trapped, mental even, where we take you on a journey of eventually freeing the mind - EPIPHANY

The music video for this song needed to be special. How could we tell our audience the story of such a complex song?

As AI is something exiting and up and coming, we decided to make something unique only to us. By feeding the lyrics of Epiphany one line at a time into the AI Midjourney, we were able to get the text translated into images.

This was what we were looking for! We could get the audience to see and feel the text and melody right in front of their eyes and ears as they were listening to the song, it was awesome. We hope you enjoy this first release as much as we do.
